Thank you for submitting a proposal application to present at the 8th annual (hybrid) Black Mental Health Symposium (BMHS). This message is a confirmation of receipt. Proposal review will begin March 22 and decisions will be made by April 15. Notifications will be sent shortly thereafter. Below you will find the title of your proposal, abstract and learning objectives for your records. Here's a copy of the most recent [BMHS newsletter](#). Enjoy and I look forward to seeing you at the BMHS.
*please notify your co-presenters, if applicable.

Interpersonal Supervision: How Polyvagal Theory can be Integrated into Counselor Supervision	Counselor educators are often faced with the dilemma of how supervisees are impacted by the effects of past trauma on their therapy. There is a need to care for supervisees' mental and emotional health as we assess them for the dispositions necessary to continue emerging as counselors. Polyvagal theory and the modalities and interventions that have arisen since its inception are effective ways of regulating emotions and allowing for the processing of past trauma as it shows up in current relationships. This presentation is focused on mental health supervisors and counselor educators searching for effective methods of caring for supervisees' mental and emotional regulation during supervision sessions.	1. The participant will evaluate current supervision practices. 2. The participant will explore the implications of polyvagal theory for supervision practices. 3. The participant will develop new practices for supervision based on the integration of polyvagal theory with supervision.
