

A group of seven people are sitting in a circle on blue chairs in a room with extensive wood paneling and a large pillar. The lighting is warm and focused on the group. The title text is overlaid in the center.

INTERPERSONAL SUPERVISION:

How Polyvagal Theory can be Integrated into Counselor supervision

Ray Wagoner M.S. LAC, Doctoral Student, Liberty University

LEARNING OUTCOMES

- The participant will evaluate current supervision practices.
- The participant will explore the implications of polyvagal theory for supervision practices.
- The participant will develop new practices for supervision based on the integration of polyvagal theory with supervision.

GAUGING THE PRESENT

Dyad discussion activity

GAUGING THE PRESENT

- Past trauma affects the ability to engage in present relationships (Beatie et al., 2018; Dale et al., 2022; Jokic et al., 2022; Mair, 2021; Morton et al., 2022; Poli et al., 2021)
- Emerging counselors can have unprocessed trauma
- Assessment is part of our responsibility

AWARENESS

Group mindfulness exercise

AWARENESS

- Safety through body psychotherapy can increase supervision effectiveness
- Mindfulness interventions are suitable for supervision
- Priming supervisees to safety is possible

(Beatie et al., 2018; Dale et al., 2022; Damis & Hamilton, 2021; Jokic et al, 2022; Mair, 2021; Morton et al., 2022; Poli et al., 2021)

PROJECTING THE FUTURE

- How are you a safe therapeutic presence in supervision settings?
- How would your supervisees say you could grow in helping them be aware of when their neuroception of a threat is present?
- How are you healing your own past trauma?
